

How to connect to Urbizone with Mac OS ?

First of all

You must be sure that you have a wireless card on your computer and that the card is ready to use (by turning power on physically and logically). If not, please refer to the section concerning the activation of the wireless card.

To connect to Urbizone

You have to make a left click on the wireless waveform on the top-right of your desktop (see picture below). And click on the name "Urbizone" to connect to this network.

If you are connected, the Urbizone a small "✓" will be in front of the network.

Finally, you just have to open your Internet browser (Internet Explorer, Firefox, Opera, Safari ...) and the login page will appear (see picture below).

If it's your first connexion to Urbizone and you don't have a login, or you forgot your password, please follow this procedure to find details.
